## B-38 G

### GUARANTEED ANALYSIS & SPECIFICATIONS

Boron (B), weight %	12.00%
As B <sub>2</sub> O <sub>3</sub> , weight %	38.00%
Bulk Density, lbs. per cubic foot	64
Particle Size	90% -6 + 16 Mesh (-4 + 1 mm) 180 SGN
Physical Appearance	Gray Granules

### PACKAGE & SHIPPING INFORMATION

Bulk, Bulk Bags, or 50 pound multiwall paper bags with PE liner	Plant location: Walnut Ridge, AR
---	----------------------------------

### AGRONOMIC CONSIDERATIONS

B-38 G is a ulexite form of Boron and readily available to plants. As a relatively low analysis product it provides a better distribution in a blend as more particles are required to supply a given amount of Boron. The risk of toxicity is reduced should formulating errors take place during a mix preparation. This form resists leaching on coarse textured soil better than sodium borates.

### GENERAL RECOMMENDATIONS

Applications of this product should be based on soil test and/or leaf analysis results. General application is about 0.5 to 1.5 pounds of Boron per acre.

### MANUFACTURING CONSIDERATIONS

Use normal bulk blending procedures. This product is intended for use in mixing or blending with other materials to produce products whose total primary nutrient guarantees equal or exceed 24%.
