### AGRONOMIC CONSIDERATIONS

Readily available forms of five micronutrients to enhance continued nutrient release. Designed to provide a “best fit” for soil and plant requirements with emphasis on Zinc, which is a critical element for seedling growth in a relatively cold seedbed.

### GENERAL RECOMMENDATIONS

Applications of this product should be based on soil test and/or leaf analysis results. Typically apply about 10 – 25 pounds per acre (in a blend), or approximately 5 – 15 pounds per acre as a side banded fertilizer (also as a component of a blend).

### MANUFACTURING CONSIDERATIONS

Use normal bulk blending procedures. This product is intended for use in mixing or blending with other materials to produce products whose total primary nutrient guarantees equal or exceed 24%.
