AGRONOMIC CONSIDERATIONS

Applications of this product should be based on soil test and/or leaf analysis results. A high analysis, readily available source of Manganese, which is granulated in a way that granules will degrade quickly in the soil. Ideal for concentrated NPK formulations that have limited room in the formulation.

MANUFACTURING CONSIDERATIONS

Used in blending with complete (NPK) fertilizers. This product is intended for use in mixing or blending with other materials to produce products whose total primary nutrient guarantees equal or exceed 24%.
